

xHeal Ad Messaging Playbook

Last updated: 2026-03-06

Use case: Paid social, search ads, short-form video hooks, advertorial intros

1) Offer-to-Message Mapping

- Offer: App install / onboarding
 - Message: Catch patterns early, act before flare-ups escalate.
- Offer: Quiz funnel
 - Message: Your symptoms are not random; find your archetype.
- Offer: Specialist-ready reports
 - Message: Walk into every appointment with complete context.

2) Hook Bank by Angle

Prevention hooks:

- What changed 48 hours before your last flare-up?
- Catch trigger patterns before symptoms hit.
- Stop reacting late. Start acting early.

Continuity hooks:

- One health story for every specialist.
- Stop repeating your history at every visit.
- Bring one timeline to every appointment.

Clarity hooks:

- Data overload is not a care plan.
- One clear next step, every day.
- Your health data is everywhere. Your answers are here.

3) Ad Structure Template

1. Hook (problem or interrupted assumption)
2. Mechanism (how xHeal works)
3. Proof (specific and credible)
4. CTA (single next action)

Short template:

"[Hook]. xHeal [mechanism]. [proof]. [CTA]."

Example:

"Flare-ups aren't random. xHeal cross-references symptoms, sleep, stress, and labs to detect your trigger patterns early. 250+ parameters connected in one timeline. Start care now."

4) Primary Claims (Approved)

- Connects 250+ health parameters
- Brings records, labs, wearables, and logs into one timeline
- Supports specialist-ready reporting
- Guideline-informed reasoning (WHO/ADA/EASD)

5) Claim Safety Rules

- Do not claim diagnosis, cure, or treatment outcomes
- Do not promise prevention certainty
- Avoid absolute language ("always", "guaranteed", "never")
- Frame as support and pattern recognition

6) CTA Rules

Use one primary CTA per ad:

- Start care now
- Get your care plan
- Build my health timeline
- Take the pattern quiz

Avoid weak CTAs:

- Learn more
- Explore now

7) Creative Brief Mini-Template

- Audience: [one segment only]
- Pain point: [single pain]
- Core message: [one pillar]
- Proof: [one proof statement]
- CTA: [one CTA]
- Format: [static/video/carousel]
- Success metric: [CTR/CVR/CPI]

8) 12 Ready-to-Test Headlines

1. Catch flare-up signals early. Act sooner.
2. Stop reacting to flare-ups. Start predicting them.
3. What changed before your last flare-up?
4. Your symptoms aren't random. Your data already knows why.
5. One connected timeline for every appointment.
6. Stop retelling your health history.
7. Data overload is not a care plan.
8. 250+ health signals. One clear next step.
9. Reports your specialist can use in minutes.
10. Bring context, not chaos, to your next visit.
11. Predict patterns. Prevent spirals.
12. See the full picture of your health.

9) 5 Ready-to-Test Primary Text Variants

1. "xHeal connects your symptoms, sleep, stress, activity, and labs to detect trigger patterns earlier. Get ahead before the next flare-up. Start care now."
2. "If your tests are normal but you still feel off, context may be missing. xHeal connects 250+ signals so you can see what changed and what to do next."
3. "Most apps track one metric. xHeal connects your full health story so your care team sees the same timeline you do. Build my health timeline."
4. "Walk into your next appointment prepared. xHeal creates specialist-ready reports from your records, labs, and wearable data."
5. "You already have data. xHeal helps you use it. See patterns earlier, take clearer action, and follow through with your care team."

10) QA Before Launch

- One audience per ad set
- One message pillar per ad
- One proof statement per ad
- One CTA per ad
- Compliance-safe disclaimer in LP context
