

xHeal Reddit 30-Day Traffic Calendar (Top 5 Communities)

Last updated: 2026-03-09

Goal: Drive qualified traffic to xheal.ai and the App Store with low moderation risk.

Primary account: Founder/personal account

Secondary account: xHeal official account (resource/link follow-up only)

Why these 5 communities

Selected using current size + activity + relevance + posting feasibility.

1. r/PCOS (about 270k members; very high activity)
2. r/Biohackers (250k+ community milestone posted by mods)
3. r/ChronicPain (~98k members from recent subreddit monitor snapshots)
4. r/CrohnsDisease (~79k members)
5. r/UlcerativeColitis (~54k members)

Rule-Safe Operating Rules

- Always disclose affiliation when mentioning xHeal.
- Days 1-14: no links unless explicitly requested.
- Days 15-30: max 1 link drop/day, only where relevant.
- Keep promo ratio $\leq 10\%$ of total contributions.
- No diagnosis or treatment claims.

Disclosure line:

"Disclosure: I m part of the xHeal team."

Community-Specific Notes

- r/PCOS: strongly protective against unsolicited selling; stay value-first.
- r/Biohackers: no AI-generated content; use human-written posts.
- r/ChronicPain: no studies/surveys/focus groups; avoid research recruitment language.
- r/CrohnsDisease: support-first culture; avoid medical certainty framing.
- r/UlcerativeColitis: support and lived-experience discussions perform best.

KPI Targets (30 days)

- 120+ valuable comments
- 8-10 original discussion posts
- 3-5 soft link drops
- 200+ profile visits
- 60+ site visits
- 25+ App Store visits

Day-by-Day Plan

Day 1

- Communities: r/PCOS, r/ChronicPain
- Actions: 6 comments (no links)
- Angle: early warning signals + tracking consistency

Day 2

- Communities: r/CrohnsDisease, r/UlcerativeColitis
- Actions: 6 comments (no links)
- Angle: flare retrospectives and appointment prep

Day 3

- Communities: r/Biohackers
- Actions: 5 comments (no links)
- Angle: signal stack / n-of-1 tracking methods

Day 4

- Communities: r/PCOS, r/Biohackers
- Actions: 6 comments (no links)
- Angle: metric combinations vs single-variable noise

Day 5

- Community: r/PCOS
- Actions: 1 discussion post + 4 comments
- Post title: "Which data points changed your treatment conversation?"

Day 6

- Communities: r/ChronicPain, r/CrohnsDisease
- Actions: 6 comments (no links)

Day 7

- Weekly review:
 - Top comments by upvotes
 - Topics with strongest replies
 - Any mod feedback

Day 8

- Communities: r/UlcerativeColitis, r/CrohnsDisease
- Actions: 6 comments (no links)

Day 9

- Communities: r/PCOS, r/ChronicPain
- Actions: 6 comments (no links)

Day 10

- Community: r/ChronicPain
- Actions: 1 discussion post + 4 comments
- Post title: "What helps you prepare for short specialist visits?"

Day 11

- Community: r/Biohackers
- Actions: 6 comments (no links)

Day 12

- Communities: r/CrohnsDisease, r/UlcerativeColitis
- Actions: 6 comments (no links)

Day 13

- Community: r/CrohnsDisease
- Actions: 1 discussion post + 4 comments
- Post title: "What changed 24-48h before your last flare?"

Day 14

- Weekly review + copy iteration

Day 15

- Community: r/UlcerativeColitis
- Actions: 4 comments + 1 soft link (only if requested)
- Link target: practical tracking template or educational blog

Day 16

- Communities: r/PCOS, r/ChronicPain
- Actions: 6 comments (no links)

Day 17

- Community: r/Biohackers
- Actions: 1 method post + 3 comments
- Post title: "Feedback wanted: flare early-warning signal stack"

Day 18

- Communities: r/CrohnsDisease, r/UlcerativeColitis
- Actions: 6 comments

Day 19

- Communities: r/PCOS, r/Biohackers
- Actions: 5 comments + 1 soft link (if requested)

Day 20

- Community: r/ChronicPain
- Actions: 1 discussion post + 3 comments
- Post title: "What is your earliest 'something is off' signal?"

Day 21

- Weekly review
- If negative sentiment on promotion appears: pause links for 3 days

Day 22

- Communities: r/PCOS, r/CrohnsDisease
- Actions: 6 comments

Day 23

- Communities: r/Biohackers, r/UlcerativeColitis
- Actions: 6 comments

Day 24

- Community: r/UlcerativeColitis
- Actions: 1 discussion post + 3 comments
- Post title: "How do you track flare patterns without overwhelm?"

Day 25

- Communities: r/PCOS, r/ChronicPain
- Actions: 6 comments

Day 26

- Community: r/CrohnsDisease
- Actions: 4 comments + 1 resource/app link (only if requested)

Day 27

- Communities: r/Biohackers, r/UlcerativeColitis
- Actions: 6 comments

Day 28

- Community: r/Biohackers
- Actions: 1 discussion post + 3 comments
- Post title: "What correlation looked real but failed in your own data?"

Day 29

- Communities: r/PCOS, r/ChronicPain
- Actions: 6 follow-up comments

Day 30

- Full month report:
 - Top 5 comments by upvotes
 - Top 3 posts by replies
 - Link CTR by community
 - Website/App Store conversion
 - Next month keep/drop decisions

Comment Library (Safe by Default)

1. "Completely fair point. Combination patterns usually beat single metrics for real-world decisions."
2. "A 7-day before/after flare log can make appointments much more actionable."
3. "If helpful, I can paste a plain-text one-page timeline template here."
4. "Trend direction over time is often more useful than one isolated number."
5. "One practical method: change one variable for 10-14 days and keep others stable."
6. "Nothing here replaces clinicians; this is mainly for prep and follow-through."

Post Library (Reusable)

1. "What changed 24-48h before your last flare?"
2. "Which appointment prep format worked best for you?"
3. "What data helped your doctor decide faster?"
4. "Best and worst trigger-tracking method you've tried?"
5. "If you track everything, what still feels unclear?"

Escalation Rules

- Removed content: acknowledge, adapt, and do not argue.
- Mod warning: shift to no-link mode for 7 days.
- Two removals in same community: pause that community for 14 days.

Weekly Reporting Template
