

xHeal Reddit Account Assignment Plan (Founder-First)

Last updated: 2026-03-06

Companion to: ./brand/reddit-30-day-calendar.md

Core Rule

Default to founder/personal account for trust-building.

Use xHeal account only for support, assets, and explicit product follow-up.

Decision Framework

Use PERSONAL account when:

- Sharing lived experience, process, mistakes, lessons
- Asking discussion questions
- Participating in sensitive health threads
- Entering a subreddit for the first time

Use XHEAL account when:

- Posting templates/checklists/resources requested by users
- Handling product-specific questions (features, data handling, report types)
- Posting official updates or clarifications
- Following up after founder has already built context in-thread

Always disclose affiliation if xHeal is mentioned.

Content Type -> Account Mapping

- Discussion post (no links): PERSONAL
- Empathy-first comments: PERSONAL
- Method/experiment threads: PERSONAL (or xHeal only if already trusted in thread)
- Resource drop (plain-text template): XHEAL preferred
- Link share (website/blog/app): XHEAL preferred
- Support response to product question: XHEAL
- Founder story / journey thread: PERSONAL

30-Day Account Assignment (from existing calendar)

Days 1-7

- Day 1: PERSONAL (comments)
- Day 2: PERSONAL (comments)
- Day 3: PERSONAL (comments)
- Day 4: PERSONAL (comments)
- Day 5: PERSONAL (discussion post + comments)
- Day 6: PERSONAL (comments)
- Day 7: Internal review (no posting)

Days 8-14

- Day 8: PERSONAL (comments)
- Day 9: PERSONAL (comments)
- Day 10: PERSONAL (discussion post + comments)
- Day 11: PERSONAL (comments)
- Day 12: PERSONAL (comments)
- Day 13: PERSONAL (discussion post + comments)
- Day 14: Internal review (no posting)

Days 15-21

- Day 15: PERSONAL (comments) + XHEAL (soft link reply only if asked)
- Day 16: PERSONAL (comments)
- Day 17: PERSONAL (discussion post) + XHEAL (technical clarifications in comments)
- Day 18: PERSONAL (comments)
- Day 19: PERSONAL (comments) + XHEAL (soft link when directly relevant)
- Day 20: PERSONAL (post) + XHEAL (template posted in comments)
- Day 21: Internal review (no posting)

Days 22-30

- Day 22: PERSONAL (comments)
- Day 23: PERSONAL (comments)
- Day 24: PERSONAL (discussion post + comments)
- Day 25: PERSONAL (comments)
- Day 26: PERSONAL (context comment) + XHEAL (App Store/resource link only if requested)
- Day 27: PERSONAL (comments)
- Day 28: PERSONAL (discussion post)
- Day 29: PERSONAL (comments)
- Day 30: Internal review + next cycle planning

Thread Handoff Pattern (Recommended)

1. PERSONAL opens and engages thread with value.
2. If users ask for specific tool/resource, PERSONAL says:
"I can have our xHeal account drop the template/link here if that helps."
3. XHEAL replies once with resource + disclosure.
4. PERSONAL continues discussion; avoid repeated xHeal replies.

Safe Scripts

PERSONAL script:

"I've seen this pattern a lot in my own work: combinations (sleep + stress + symptoms) are usually more informative than one metric. If useful, I can share the exact one-page format I use."

XHEAL resource script:

"Sharing the resource requested above: [URL or plain-text template]. Disclosure: I'm part of the xHeal team."

XHEAL product script:

"On xHeal specifically: it supports pattern tracking and care-team prep, but it does not diagnose or replace clinicians. Disclosure: xHeal team."

Anti-Spam Guardrails

- Never have both accounts push links in the same thread.
- Avoid same-day duplicate comments from both accounts in one subreddit.
- Cap xHeal account activity to 10-20% of total monthly actions.
- If a mod flags promo risk, switch to PERSONAL-only no-link mode for 7 days.

Weekly Audit

- % posts/comments by PERSONAL vs XHEAL
- Link drops by account
- Upvote/reply quality by account
- Removal/flag incidents by account
- Decision: keep, reduce, or increase xHeal account presence
