Subject Line Variants

1. Why xHeal is not just another tracker (Recommended)
2. Trackers collect data. xHeal guides action.
3. What makes this different in practice

Preview Text

The difference is not more data. It is better decisions.

Hi [First Name],

Many health apps stop at collection.

You log numbers, maybe see charts, then still ask:
"What should I do differently tomorrow?"

xHeal is built to answer that question by connecting:

- symptom trends
- behavior patterns
- consistency signals
- early warning indicators

The goal is not to store more data.

The goal is to reduce uncertainty in day-to-day decisions.
